Three Easy Steps to Follow...

STEP ONE

1

1

Clean Substrate - Remove loose, delaminated plaster and contaminants.

STEP TWO

2

2

Mix **BONDKOTE**® properly. One unit of **BONDKOTE**® consists of two units of powder and one unit of resin.

STEP THREE

3

3

Apply **BONDKOTE**®, ensuring application is uniform in thickness and texture.

BONDKOTE® is a scientifically formulated two-part cementitious primer. It is specifically designed to be used as a superior substrate to mechanically bond pool coatings over existing plaster finishes.

BONDKOTE® Powder and Resin is produced to SGM's exact and rigorous quality control standards. Only the highest quality raw materials and ingredients are used in the manufacturing process of SGM's **BONDKOTE**® - Surface Preparation System. You can rest assured, from job to job, you will get the best bond possible.

BONDKOTE®'s acceptance and world wide trouble free use by pool finishing professionals in hundred's of thousands of pools is a testimonial to **BONDKOTE**®'s success, quality and durability. In addition **BONDKOTE**® offers you more flexibility! **BONDKOTE**® is designed to easily fulfill large pool projects demands today and tomorrow. It is the latest product targeted at greatly reducing your time and labor in pool surface preparation.
